---

## PROFESSIONAL SUMMARY

Recent **B.Sc. Computer Science graduate and entry-level Data Analyst** with practical internship and project experience in **data cleaning, data analysis, data validation, reporting, KPI tracking, dashboard development, and data visualization**. Skilled in **Microsoft Excel, SQL, Power BI, Power Query, DAX, and Python**. Experienced in organizing datasets, identifying trends and patterns, preparing data summaries, validating data quality, and presenting analytical findings. Strong analytical thinking, attention to detail, problem-solving ability, and willingness to learn new technologies.

## TECHNICAL SKILLS

**Data Analytics:** Data Analysis, Data Cleaning, Data Validation, Data Organization, Data Quality, Trend Analysis, Pattern Analysis, KPI Tracking, Business Metrics, Reporting, Data Summaries

**Microsoft Excel:** Advanced Excel, Data Cleaning, Data Analysis, PivotTables, Lookup Functions, Charts, Conditional Formatting

**SQL:** SQL, SQL Server, MySQL, SELECT, WHERE, GROUP BY, HAVING, JOINS, Subqueries, CTEs, Aggregate Functions, Window Functions

**Business Intelligence:** Power BI, Power Query, DAX, Data Modeling, KPI Reporting, Dashboard Development, Data Visualization

**Programming:** Python, Basic Data Analysis

**Professional Skills:** Analytical Thinking, Logical Thinking, Attention to Detail, Problem Solving, Communication, Team Collaboration, Willingness to Learn

## INTERNSHIP EXPERIENCE

**Data Analyst Intern | Y-Saas Technologies**

**January 2026 – June 2026**

- Collected, organized, cleaned, and transformed datasets using **Excel, SQL, and Power Query**.
- Performed **data analysis and validation** to identify inconsistencies, errors, and data-quality issues.
- Developed interactive **Power BI dashboards** to track business metrics, KPIs, trends, and performance indicators.
- Created **DAX measures and calculated metrics** to support reporting and data-driven insights.
- Wrote SQL queries for data extraction, filtering, aggregation, cross-validation, and analysis.
- Prepared analytical reports and data summaries to communicate findings clearly.
- Collaborated with team members to understand data requirements and support data analysis tasks.

## PROJECTS

**HR Analytics Dashboard | Power BI | SQL | Excel**

- Analyzed employee data to identify **workforce trends, attrition patterns, employee performance, and satisfaction insights**.
- Cleaned and transformed raw datasets using **Power Query**.
- Developed interactive **Power BI dashboards** with KPI cards, charts, filters, and slicers.
- Created **DAX measures** for employee count, attrition rate, and key workforce metrics.
- Presented analytical findings through **data visualizations and KPI reporting**.

**Student Performance Analysis | Excel | Power BI**

- Analyzed student attendance and academic performance datasets to identify **trends, patterns, performance indicators, and outliers**.
- Cleaned and validated raw spreadsheet data using **Microsoft Excel**.
- Used PivotTables, formulas, charts, and KPI summaries to analyze performance.
- Built Power BI visualizations to present academic insights clearly.
- Prepared reports supporting **data-driven decision-making**.

**COVID-19 Global Analysis Dashboard | SQL | Power BI**

- Analyzed global COVID-19 datasets using **SQL** to identify chronological trends and case patterns.
- Performed data filtering, aggregation, and validation to prepare reliable analytical datasets.
- Modeled relational data in Power BI for geographic and time-based analysis.
- Developed dashboards with KPI cards, trend charts, maps, and data visualizations.
- Communicated key analytical findings through interactive visual reporting.

#### **Hospital Management System | SQL Server**

- Designed a relational **SQL Server database** for patients, doctors, departments, appointments, treatments, and billing.
- Applied **SQL queries, JOINs, aggregate functions, subqueries, CTEs, views, stored procedures, functions, triggers, and window functions**.
- Created analytical reports including department-wise patient counts, appointment analysis, monthly revenue, and pending payments.
- Applied data integrity and validation concepts using primary keys, foreign keys, constraints, and database relationships.

### **EDUCATION**

#### **Bachelor of Science (B.Sc.) – Computer Science**

Kasturi Shikshan Sanstha, Pune | Savitribai Phule Pune University | 2022 – 2025 | **CGPA: 7.65/10**

### **CERTIFICATION**

#### **Professional Data Analyst Course | CIIT Training Institute | May 2025 – December 2025**

**Skills Covered:** Advanced Excel, SQL, Power BI, Power Query, DAX, Data Modeling, ETL, Dashboard Development, Data Visualization, and Data Analysis

### **LANGUAGES**

English | Marathi | Hindi
